

Chemistry Content Standards:

The kinetic molecular theory describes the motion of atoms and molecules and explains the properties of gases.

Standard 4g: Students know the kinetic theory of gases relates the absolute temperature of a gas to the average kinetic energy of its molecules or atoms.

Stamp HWK: **Ideal and Combined Gas Laws**

Classwork: **Gas Laws magic Squares A-I**
Students will record work and answers on their own paper noting the division between the two assignments

Construction: **Hot Air Balloon Construction**
Students will begin construction by gluing three pieces of tissue paper together for the 7 Gores

Homework: cans (1/2pt. each for up to 20) for extra credit
